Storyboard — IA#1 Homepage Layout Designs

This storyboard document presents two wireframe layout designs for the IA#1 Homepage. Both layouts are created in plain black and white, with labeled sections representing the main groups. Each layout adheres to the responsive design breakpoints specified in the assignment: Mobile Layout: minimum width of 600px Desktop Layout: minimum width of 950px
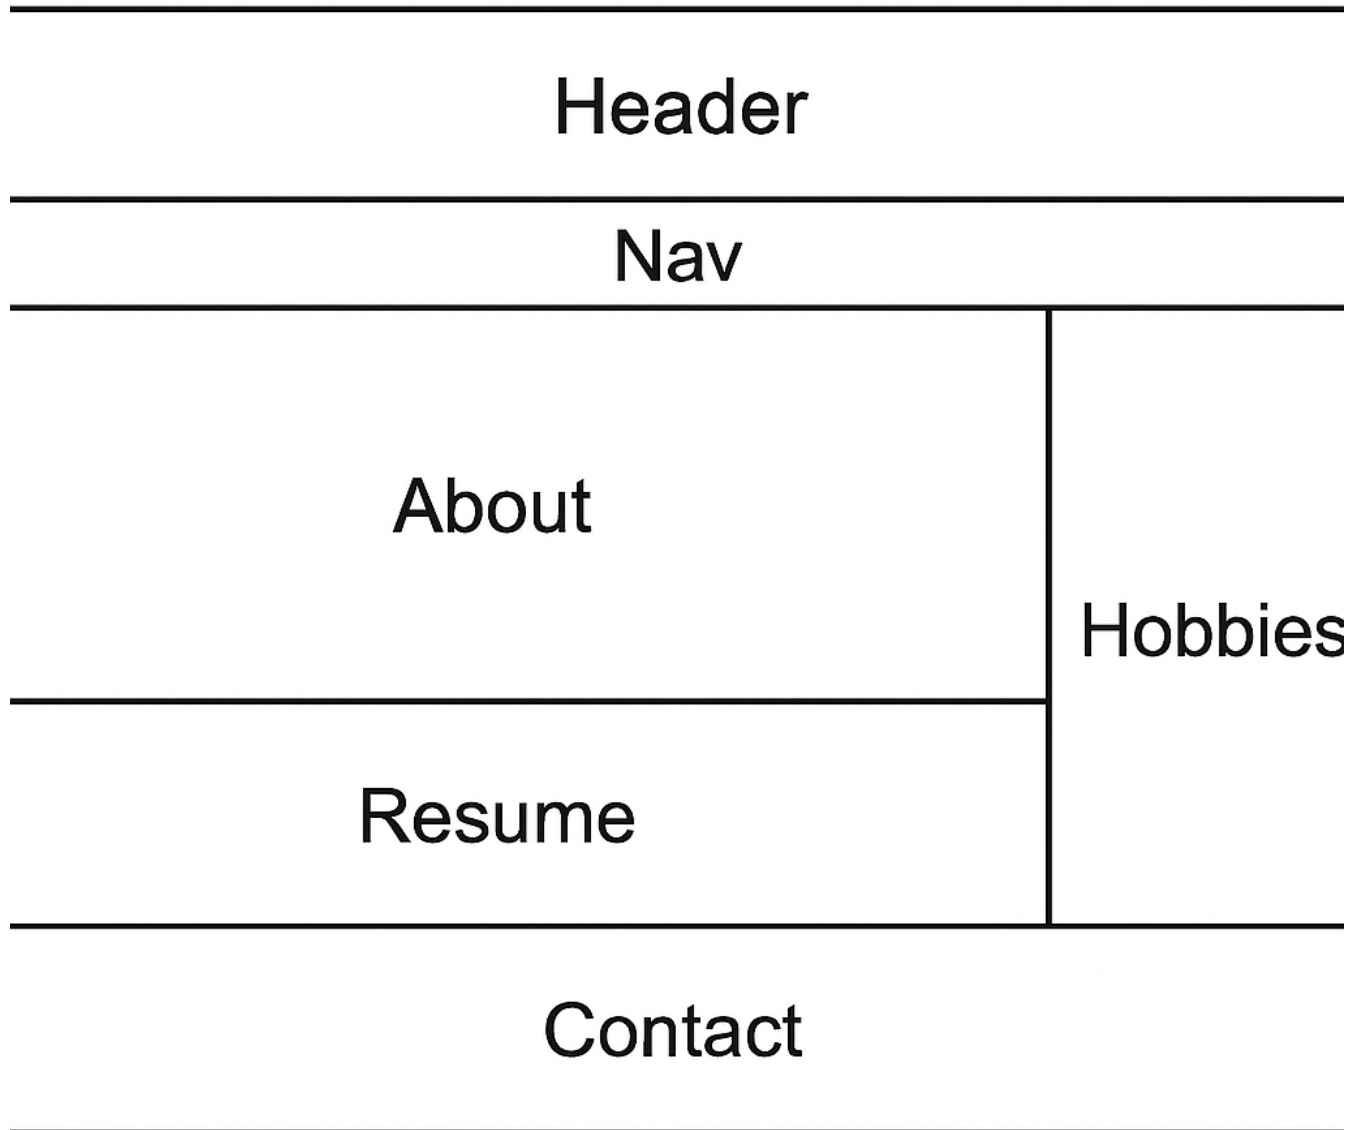

Mobile Layout (min 600px)

Header
Nav
About
Resume
Hobbies
Contact

Desktop Layout (min 950px)

Header

Nav

About

Hobbies

Resume

Contact

Each section (Header, Nav, About, Resume, Hobbies, and Contact) represents the primary content structure. The mobile layout stacks sections vertically for simplicity and readability, while the desktop layout places 'Hobbies' alongside 'About' and 'Resume' using a grid/flex-based layout for better use of horizontal space.
